

SPILL CONTAINMENT 101

Battery Containment

DESCRIPTION

Spill containment is a requirement of federal, state and local fire and hazardous material codes, regulations, ordinances and guidelines. While these vary by municipality, recent fire codes for stand-by battery systems call for approved methods and materials for acid spill control and neutralization. This module provides an understanding the requirements of the Authorities Having Jurisdiction and how to specify spill control and neutralization.

COURSE LEARNING OBJECTIVES

- Understand what codes and regulations apply for spill containment
- Selection criteria for neutralization
- Specify Spill Containment Systems to meet your need
- Know how to Size & Configure for your application
- Considerations for installation

THIS COURSE SHOULD BE COMPLETED BY: Consulting Engineers, Electrical Contractors, Facility Engineers, Application Engineers, Battery and UPS Sales Reps.

COMPLIANCE REFERENCE: IFC 608, NFPA 1 Article 52, UFC Article 64

COURSE LENGTH : 30 minutes – CEU: 0.05
