

Course Syllabus

TMM4007 - Lead Safety

This Lead Awareness Training course combines exciting video footage with interactions to teach workers about lead safety. It covers OSHA's Lead Standards for both General Industrial Standard as well as Construction. This training is for employees in general industry and construction environments where lead and lead-based materials are found. 'Lead Awareness Training' addresses the major areas required by the regulations. Because of the widespread historical use of lead-based paints, as well as other materials containing lead, this program is useful to building and construction workers, manufacturing workers, recyclers and many others. This Lead Awareness Training qualifies for continuing education units.

Who should take this course?

Lead awareness training is required for employees in both industry and construction where lead-based materials are found.
