

# MACHINE SAFEGUARDING

Construction Safety

## Course Syllabus

### TMC4030 - Machine Safeguarding

Machine safeguarding has become an important means of keeping the workplace safe. Machine safeguarding refers to specific controls designed to prevent employees from coming into contact with equipment that could cause injury. By understanding where the hazards exist in your workplace, supervisory personnel can help ensure that proper safeguards are in place to protect employees. In addition, all employees who work with potentially hazardous machinery or operations need to understand how machine safeguards work and how to use them to prevent injury.

## Course Learning Objectives

- Recognize mechanical hazards of your equipment.
- Use safeguards to properly reduce hazards.
- Appreciate the limitations of machine safeguards.
- Follow safeguarding requirements.
- Apply general safety practices to machine use

## Formatting and Pricing
