

TRAINING

EnviroGuard Factory Installer Training

These comprehensive training courses present a proven process for Installing EnviroGuard's UL Listed spill containment systems (FIT 1), Retrofitting a spill containment kit in an in-place or on-line battery system (FIT 2), and Replacing battery neutralization and absorption pillows (FIT 3). During the courses, proper techniques are demonstrated to ensure each system will be liquid-tight, functional and maintain the UL integrity throughout the installation.

The sessions will identify the various system components, list the tools required and provide step-by-step procedures that minimize time and maximize quality control. Upon successful course completion; a "FIT" Certificate and Badge will be provided identifying each individual trained. "Factory Authorized Installers" will be able to confidently Install (FIT 1), Retrofit (FIT 2) or Replace (FIT 3) EnviroGuard's spill containment systems and pillows designed for flooded, VRLA, cabinet and relay rack battery applications.

To request this training or for more information, contact;

- » Jack Marte - Customer Service Manager
- » Call: 909.368.0668
- » Email: jmarte@enviroguard.com
- » Visit: EnviroGuardUniversity.com

You will be able to:

- » Access the course online or through the EnviroGuard App
- » Recognize and Match EnviroGuard's UL Listed Spill Containment Systems by application
- » Properly install EnviroGuard's UL Listed Spill Containment Systems
- » Know who to contact for technical support
- » Once you have completed the FIT 1 and FIT 2 course, you can be listed on our Referral Program

These Courses are designed for:

- » Battery Specialists
- » Electrical Technicians
- » Service and Sales Associates
- » Project Managers
- » Site Supervisors
- » General Contractors
- » Facility Managers

Training and Compliance Reference:

- » Training per Underwriter Laboratories Category VMXB
- » Spill containment requirements per IFC 608 and NFPA 1 Article 52, OSHA CFR 29

Recommended Prerequisites:

- » Battery Room Safety Awareness

EnviroGuard Factory Installer Training courses were developed by a team of certified professionals that have more than 80 years combined experience in construction, project management, manufacturing, environmental compliance application and quality control.

The instructions have been reviewed and approved by UL and are recognized as part of the global UL recognition that is specific to the EnviroGuard's UL Listed Spill Containment Systems covered in this training course.
