

OSHA 30 HOUR CONSTRUCTION INDUSTRY SAFETY

EnviroGuard Live On-Site Training

Course Syllabus

OSHA 30 hour Construction Industry Safety

The 30 Hour Construction Industry Training course is a comprehensive safety program designed for anyone involved in the construction industry. Specifically devised for safety directors, foremen, and field supervisors; the program provides complete information on OSHA compliance issues. Construction workers must receive additional training, when required by OSHA standards, on specific hazards of the job. Upon successful completion of the course, participants will be mailed a Department of Labor 30-Hour Construction Certification Wallet Card.

Course Learning Objectives

At the end of the training, the student will be able to:

- Locate OSHA Standards references applicable to specific hazardous conditions and practices.
- Recognize the aspects of 1926 Subpart C.
- Implement preventative measures for accidents in their workplace.
- Describe types of personal protective equipment (PPE), and the requirements for use in OSHA standards.
- Understand the requirements for fire protection in the workplace.
- Identify types of rigging equipment used to protect employees.
- Identify the critical health and safety hazards of welding and cutting in the construction industry.
- Identify common electrical hazards and related OSHA standards.

Who should take this course?

OSHA 30 hour training is designed for foremen, directors, supervisors or other onsite managers. Safety training courses offered by Enviroguard provide complete information on OSHA standards compliance.
