

NFPA 70E STANDARD FOR ELECTRICAL SAFETY IN THE WORKPLACE

EnviroGuard Live On-Site Training

Course Syllabus

NFPA 70E Standard for Electrical Safety in the Workplace

This safety course will assist the employer in meeting the safety training requirements of NFPA 70E for a qualified person. This course will focus on the NFPA 70E with additional information on the hazards of electrical shock, arc, and blast along with the selection requirements for personal protective equipment for these hazards. The NFPA 70E requirements for electrical safety-related work practices, which include the "Flash Hazard Analysis", are covered in detail.

Course Learning Objectives

At the completion of this course the student will

- Be able to state the causes of Arc Flash and Blast
- Define the Flash Protection Boundary
- Identify the steps required for PPE Selection
- Describe the methods used to reduce the arc flash hazard

Formatting and Pricing

Format: On-Site

Catalog# TML5005

Who should take this course?

This information-packed course is a must for all electrical personnel working around voltages of 50 volts or more, including maintenance, supervision, engineering, construction, inspection and safety

Course Length:

One or Two Days
