

GENERAL ELECTRICAL SAFETY

EnviroGuard Live On-Site Training

Course Syllabus

General Electrical Safety

This training course is designed to meet the minimum mandated training requirements specified in OSHA 29 CFR 1910.331-.335 for those employees classified as "Qualified" which work on or near exposed electrical parts operating at 50 volts or more, or for those employees classified as "Unqualified" but are exposed to electrical hazards during their job duties.

Course Learning Objectives

Upon completion of this course, the participant should be able to:

- Identify electrical hazards in the workplace
- Learn the proper care and use of personal protective equipment according to OSHA
- Understand OSHA mandated requirements for performing energized and de-energized work
- Learn the specific requirements for electrical hazardous energy control
- Identify the hazards of specific electrical equipment
- Learn additional safety requirements per 1910.303 and 1910.269
- Identify the safe workspaces and approach distances
