

# ELECTRICAL SAFETY FOR MANAGERS

EnviroGuard Live On-Site Training

## Course Syllabus

### Electrical Safety for Managers

This is a 1-day course for those responsible for the activities of their workers. Learn what the new 2012 NFPA 70E Standard requires for compliance. Find out how to keep workers safe and equipment from being damaged.

## Course Learning Objectives

Upon completion of this course, participants will receive a training certificate indicating that the student understands:

- The hazards of electricity
- Damage caused to people and equipment from poor electrical safety practices
- What "Arc Flash Analysis" is and why it is important
- What it takes to make your employees "Qualified Electrical Workers"
- Where and when different types of PPE should be worn (it may surprise you!)
- How OSHA and NFPA rules apply to your workplace
- How to establish compliance, and the penalties for non-compliance
- Recommendations for creating a quality Electrical Safety Program at your facility

## Who should take this course?

This seminar is a must for anyone who is in supervision or management and is responsible for personnel who work on or around any electrically energized equipment at industrial plants, utilities or commercial and private building facilities

## Course Length:

One Day
