

ARC FLASH AWARENESS

EnviroGuard Live On-Site Training

Course Syllabus

Arc Flash Awareness

This program covers the Federal OSHA regulations which require arc flash protective PPE and clothing, the NFPA 70E and statistical data from the CDC/NIOSH on electrical injuries. Also covered is the interpretation of arc flash labels applied to equipment, including approach distances and boundaries. This program is designed to ensure employees are aware of the hazards, reduce the risk of working on or near energized equipment, as well as come into compliance with OSHA regulations.

Course Learning Objectives

At the completion of this course the student will:

- Be able to state the causes of Arc Flash and blast
- Define the Flash Protection Boundary
- Identify the steps required for PPE Selection
- Describe the methods used to reduce the arc flash hazard
