

Non-Seismic Modular Step Rack

ERO Rack Series

EnviroGuard's ERO Step Rack is a modular design for non-seismic applications. The ERO line can deliver significant savings in those areas where seismic requirements are not prescribed by AHJ (Authorities Having Jurisdiction). The ERO rack supports lead acid and nickel cadmium batteries in various applications.

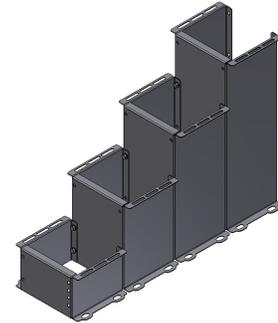

Features & Benefits:

- » Heavy Duty Flexible Design - holds up to 54 lb/in
- » Double Modules: Block Module design carries double the load bearing capability of similar racks
- » Configurations include 1T1R, 1T2S, 1T3S and 1T4S
- » Integrated spill containment available
- » Comes standard with galvanized rails with acid resistant covers, ANSI 61 powder coated rails available
- » Made for most makes and models of batteries
- » Easy Assembly, modules shipped pre-assembled for reduced set-up time
- » Integrated grounding holes
- » Manufactured In-House (USA), ISO 9001-2015
- » Delivery is available in only 2-3 weeks in common configurations

Certified by a Structural and Professional Engineer, the ERO Rack provides rugged construction and a safe, economical solution.

The racks are easy to assemble, designed to fit most manufacturers' battery models, and feature optional UL Listed and patented spill containment systems with neutralization and absorption.

Other Product Considerations:

- » Battery terminal covers
- » Battery termination plate covers
- » Spill containment and clean up kits for lead acid or nickel cadmium batteries
- » Eyewash station
- » Hydrogen detection systems
- » Protective shields
- » Battery Room Sign Kits
- » Personal Protection Equipment (PPE)
