Non-Seismic Heavy Duty Rack

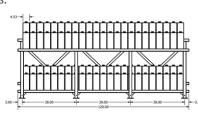

ARO Rack Series

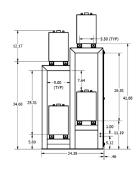

EnviroGuard's ARO Step Rack is a modular design for non-seismic applications. The ARO rack supports lead acid and nickel cadmium batteries in various applications, most often in utility and petrochemical as well as high temperature environments.

Product Features:

- » Heavy Duty Modular Design.
- » Fully welded powder coated stanchions.
- » Configurations include 1T2S, 1T3S, 2T2S and 2T3S.
- » Seismic Configurations available in all rack models.
- » 2-3 Rails per step (based on weight of battery system).
- » Comes standard with galvanized rails with acid resistant covers. ANSI 61 powder coated rails available.
- » Made for most makes and models of batteries.
- » Cross braces for uniform spacing.
- » Easy Modular Assembly.
- » Manufactured In-House (USA), ISO 9001-2015.
- » Delivery is available in only 2-3 weeks in common configurations.

Certified by a Structural and Professional Engineer, the ARO Rack provides rugged construction and a safe economical solution.

The racks are easy to assemble, designed to fit most manufacturers' battery models, and feature optional UL Listed and patented integrated spill containment systems with neutralization and absorption.

Other Product Considerations:

- » Battery terminal covers
- » Battery termination plate covers
- » Spill containment and clean up kits for lead acid or nickel cadmium batteries
- » Eyewash station

- » Hydrogen detection systems
- » Protective shields
- » Battery Room Sign Kits
- » Personal Protection Equipment (PPE)
